**As a copywriter**, my skill is taking a brand's voice and making it likeable, distinct and human. At *Wunderman Thompson (NZ)*, I was tasked with creating the TOV for *Metlink Wellington*, which was struggling with public dissatisfaction and a landslide of customer complaints. After giving them a cheeky yet honest voice and overhauling how they connected with customers, within 9 months, complaints reduced by 31% and overall satisfaction improved 20%.

**As a creative**, I'm dedicated to brave, insight-driven ideas that push past the obvious. From flipping a stereotype for a car campaign to scaling a small *Airpoints* brief into a high-impact TVC, I create work that makes audiences feel something and makes a brand impossible to forget.

I've worked with a diverse array of clients, including *Ford*, *Shell* and *Subway*, and grew my own *TikTok* account to 59k followers in under a year, giving me a grounded understanding of content creation, digital storytelling, and how to build a real relationship with your audience.

Having freelanced and worked in filmmaking over the last few years, I'm excited to find my next creative home, become part of a team, and produce work I'm proud of.

Over the last six years, I've freelanced locally and internationally (*Trout*, *The 8Agency* and *Adobe* in *London*).
